Protection, Bari, Italy

Deadline for manuscript  
submissions:

**closed (20 October 2022)**

### Message from the Guest Editors

Globalization and climate change are significantly shaping the worldwide distribution of plant harmful organisms and alien invasive species. Effective surveillance strategies are critical to support prevention and biosecurity plant health programs. Early detection and correct identification of pests and disease agents require effective and sensitive diagnostic tools that NPPOs can adopt for implementing their monitoring programs to reduce risks posed by exotic and alien pathogens/pests. Nowadays, molecular methods and remote sensing approaches have improved the efficiency and the capability for inspections and for testing. But we need to go further and improve pathogen detection at the earliest stage of the infections as well as gather information on the genetics of the pathogen population(s), a crucial step for setting proper control actions. Likely, the next frontiers will be the use of high-throughput sequencing (HTS) technologies, the use of remote sensing approaches for prioritizing areas to be inspected, and the development of point-of-care tests (POCT), once validated and cost-efficient.

## Message from the Editor-in-Chief

*Agriculture* (ISSN 2077-0472) is an international, crossdisciplinary and scholarly open access journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. *Agriculture* is published in an open access format – research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the public have unlimited and free access to the content as soon as it is published.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

**Journal Rank:** JCR - Q1 (*Agronomy*) / CiteScore - Q2 (*Plant Science*)
