25 April 2022

Message from the Guest Editors

Maintaining economically and environmentally sustainable cropping systems and practices is one of the most imperative challenges in innovative sustainable agriculture. Therefore, a deeper understanding of how to innovate cropping systems and practices with the aim of maintaining sustainability in agriculture is of crucial importance. Innovative conservation cropping systems and practices can improve agroecosystems productivity, reduce energy input, increase synergies between food production and ecosystem conservation, and increase farmers' profits.

This Special Issue focuses on the development and assessment of innovative conservation cropping systems and practices in determining system productivity and enhancing crop production and soil quality. This issue "Innovative Conservation Cropping Systems and Practices" will cover applied engineering for achieving a sustainable balance among productivity, environmental, and profitability factors. The aim is to present a collection of research articles that cover a broad range of cropping systems and practices from farmland ecosystem. All types of articles, e.g., original research, opinions, and reviews, are welcome.

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, crossdisciplinary and scholarly open access journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. *Agriculture* is published in an open access format – research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the public have unlimited and free access to the content as soon as it is published.

Author Benefits

Open Access:— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), AGRICOLA, AGRIS, RePEc, and many other databases.

Journal Rank: JCR - Q1 (*Agronomy*) / CiteScore - Q2 (*Agronomy and Crop Science*)
