Message from the Guest Editor

Food security is a multifaceted issue that continues to receive much attention from researchers across the world. Food security affects rural and urban households, whether engaged in raising food or not. Among those affected are family farmers whose efforts are challenged by issues such as weather events, climate change, poor storage, input markets, lack of accurate price signals, and sales contract enforcement failure, to name a few. Furthermore, among farming households facing food insecurity are not only the ultra-poor subsistence farmers but those who participate in market exchanges, at least seasonally. Education, experience, access to extension services and current knowledge, and division of responsibilities within a family farm household also may influence household food security. The recent global COVID-19 pandemic has become a potential source of food insecurity to farm households that did not experience food shortage in the past. Those and related topics are of interest to this issue of *Agriculture*. This Special Issue invites submissions addressing these and other issues shaping food security across the world's farms and farming communities.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, crossdisciplinary and scholarly open access journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. *Agriculture* is published in an open access format – research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the public have unlimited and free access to the content as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank: JCR - Q1 (*Agronomy*) / CiteScore - Q2 (*Plant Science*)
