

## Isotopic & Nuclear Techniques in Studying (Agro)environmental Processes

Guest Editors:

**Prof. Dr. Gabrijel Ondrasek**

**Dr. Emil Fulajtar**

**Prof. Dr. Branko Petrinec**

Deadline for manuscript  
submissions:

**1 October 2024**

### Message from the Guest Editors

Recently, the detection and monitoring of some environmental processes (erosion, soil moisture regime, salinization) have become instant and accurate due to significant improvements to sensors/detectors and integration with remote sensing and IoT solutions. Such combinations of advanced techniques enable the processing of large datasets and the analysis of numerous studies conducted under variable conditions (e.g., meta-analyses), while the application of artificial intelligence and machine learning algorithms enables the testing of various scenarios under different climate conditions. Therefore, multidisciplinary approaches (e.g., isotopic and nuclear techniques combined and upgraded with hydrogeological, physiological, and molecular methods) to address challenges in agroenvironmental research will provide more holistic and proactive solutions for agroecosystems management.

For this Special Issue, we welcome all manuscript types (original studies, reviews, communications, opinions, perspectives, discussions) that show novelty on topics including, but not limited to, the listed keywords.

an Open Access Journal by MDPI

## **Message from the Editor-in-Chief**

*Agronomy* draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet. *Agronomy* is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

## **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

**Journal Rank:** JCR - Q1 (*Agronomy*) / CiteScore - Q1 (*Agronomy and Crop Science*)
