Deadline for manuscript
submissions:

closed (28 February 2022)

Message from the Guest Editors

Forage crop agronomy systems are essential for feeding domestic animals and wildlife, but they must also be protective of the environment. Submissions on the following topics are invited: 1) The adaptation and potential of the targeted production of certain grass and forage crops for domestic animals (dairy cattle, horses, sheep, etc.); 2) Modern forage crop agronomy systems for feeding domestic animals; 3) Providing better quality nutrition and creating conditions to improve the health, reproduction, and production of wildlife and increasing the profits from trophy-hunting tourism; 4) Nutritional value of forage crops grown, with special emphasis on their protein and energy value, mineral structure, and palatability; 5) Elaborating the systems of forage crops production for animal nutrition in different ecological regions. The nutritional potential of wildlife and farm animals can be improved by growing forage crops in order to meet the specific needs of particular animal species.

an Open Access Journal by MDPI

Wine, University of Adelaide,
Urrbrae, SA 5064, Australia

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet. *Agronomy* is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank: JCR - Q1 (*Agronomy*) / CiteScore - Q1 (*Agronomy and Crop Science*)
