Yangling 712100, China

Deadline for manuscript  
submissions:

**closed (29 February 2024)**

### **Message from the Guest Editor**

This Special Issue aims to bring together contributions of original research articles, reviews, and case studies from different parts of the world on the topic of "Influence of Land Use Patterns on Soil Physical Quality". The scope of this Issue covers a wide range of land use types, including agricultural systems, urban development, forestry, industrial activities, and natural ecosystems.

Potential topics of interest include but are not limited to, assessing the impacts of land use change on soil physical properties, evaluating the effectiveness of conservation practices in mitigating soil degradation, examining the interactions between land management practices and soil physical quality, investigating the role of land use planning in preserving soil health, and exploring innovative approaches for sustainable land use to enhance soil physical quality.

## **Message from the Editor-in-Chief**

*Agronomy* draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet. *Agronomy* is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

## **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

**Journal Rank:** JCR - Q1 (*Agronomy*) / CiteScore - Q1 (*Agronomy and Crop Science*)
