Economics, Agricultural
University, ul. Poduźna 3, 30-239
Kraków, Poland

Deadline for manuscript
submissions:

closed (25 January 2022)

Message from the Guest Editors

Dear Colleagues,

This Special Issue is dedicated to novel perspectives on improving crop tolerance to abiotic stressors. Constant climatic changes and strong dependence of crop yield on environmental conditions are widely known and understood issues. Despite intense research in this area, however, we remain unable to take full advantage of the yield potential in unfavorable environmental conditions. This demonstrates how much there is to be done, and how important such studies are for contemporary and future agriculture.

Studies conducted in this field differ not only in the plant material and investigated stresses but also in research methods. We believe that diversity and the wide range of topics make such papers both interesting and inspiring for the scientific community. Therefore, in this Special Issue, we wish to review the latest updates on improving crop resistance to abiotic stress using the advanced methods of genomics, proteomics, and metabolomics.

Authors are invited to submit original research papers, communications, and reviews exploring different aspects of this topic.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet. *Agronomy* is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank: JCR - Q1 (*Agronomy*) / CiteScore - Q1 (*Agronomy and Crop Science*)
