Message from the Guest Editors

Dear Colleagues,

The dairy industry provides different by-products that can be exploited and converted into high-value ingredients to be used in foodstuff, infant formula, medicines, and pet food. For example, whey proteins of bovine milk are commercially available for athletes in several forms today, and market demand is increasing. In dairy, other good examples of reutilization and valorization are milk lactose, widely used as excipient, and bovine colostrum for the pharmaceutical and the cosmetic industry. The present Special Issue aims to open the discussion on the role of some dairy byproducts as a source of precious bioactive compounds for human beings and companion animals, with particular focus on milk whey and colostrum.

Message from the Editor-in-Chief

Animals is an on-line open access journal that was first published in 2011. *Animals* adheres to rigorous peerreview and editorial processes and publishes only high quality manuscripts that address important issues in the many varied disciplines that involve animals, with a focus on animal science, animal welfare and animal ethics. *Animals* is covered in the Science Citation Index Expanded (SCIE) in Web of Science, with the latest Impact Factor: 3.0 (2022, ranks 12 /62 (Q1) in ‘Agriculture, Dairy & Animal Science’; 13/143 (Q1) in ‘Veterinary Sciences’), 5-Year Impact Factor: 3.2.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, Animal Science Database, CAB Abstracts, and other databases.

Journal Rank: JCR - Q1 (*Veterinary Sciences*) / CiteScore - Q1 (*General Veterinary*)
