2. LABBELS–Associate Laboratory, 4710-057 Braga, Portugal

Dr. Nuno F. Azevedo

LEPABE, Department of Chemical Engineering, Faculty of Engineering of the University of Porto, Rua Dr Roberto Frias, 4200-465 Porto, Portugal

Deadline for manuscript submissions:

closed (30 September 2020)

Message from the Guest Editors

This Special Issue of *Antibiotics* deals with different strategies to prevent biofilm formation or control development. The issue welcomes various submission types, such as original research papers, short communications, reviews, case reports, and perspectives.

Potential topics for this Special Issue include different antifouling strategies but are not limited to:

- Phages or phage-derived enzymes;
- Use of physical approaches (photoporation; sonoporation);
- Development of antimicrobial peptides or nucleic acid mimics;
- Use of natural products;
- Modification of surfaces to prevent biofilm formation;
- Combinations of antimicrobial agents with a synergistic effect.

an Open Access Journal by MDPI

Molecular Bioscience, University
of Wollongong, Wollongong, NSW
2522, Australia

Message from the Editor-in-Chief

There are very few fields that attract as much attention as scientific endeavor related to antibiotic discovery, use and preservation. The public, patients, scientists, clinicians, policy-makers, NGOs, governments, and supra-governmental organizations are all focusing intensively on it: all are concerned that we use our existing agents more effectively, and develop and evaluate new interventions in time to face emerging challenges for the benefit of present and future generations. We need every discipline to contribute and collaborate: molecular, microbiological, clinical, epidemiological, geographic, economic, social scientific and policy disciplines are all key. *Antibiotics* is a nimble, inclusive and rigorous indexed journal as an enabling platform for all who can contribute to solving the greatest broad concerns of the modern world.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPUS / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Pharmacology & Pharmacy*) / CiteScore - Q1
(*General Pharmacology, Toxicology and Pharmaceutics*)
