and Biosciences, University of  
Milano-Bicocca, Milano, Italy

**Prof. Dr. Michele Papa**

Laboratory of Neuronal Networks  
Morphology and System Biology,  
Department of Mental and  
Physical Health and Preventive  
Medicine, University of Campania  
“Luigi Vanvitelli”, 80138 Naples,  
Italy

Deadline for manuscript  
submissions:

**closed (20 September 2022)**

### **Message from the Guest Editors**

Age-related increases in oxidative stress and neuroinflammation are common hallmarks of chronic neurodegenerative disorders, such as Alzheimer’s (AD) and Parkinson’s (PD) diseases. Accumulation of reactive oxygen species (ROS) is a natural consequence of the neuronal oxidative metabolism and may overwhelm the antioxidant defenses, thus leading to oxidation of cellular components, mitochondrial dysfunction, redox dysregulation, and alteration of energy metabolism. On the other hand, neurodegeneration is characterized by neuroinflammation, disruption of astroglial function, and mechanisms of maladaptive plasticity. Moreover, as part of the blood–brain barrier, astrocytes play an essential role in neurovascular coupling and neuronal metabolism.

We invite you to submit your contribution as an original research or a review article to this Special Issue, which aims to collect current knowledge concerning mechanisms of oxidative stress and neuroinflammation and their impact on neuronal and glial function in aging and neurodegenerative disorders.

## Message from the Editor-in-Chief

It has been recognized in medical sciences that in order to prevent adverse effects of "oxidative stress" a balance exists between prooxidants and antioxidants in living systems. Imbalances are found in a variety of diseases and chronic health situations. Our journal *Antioxidants* serves as an authoritative source of information on current topics of research in the area of oxidative stress and antioxidant defense systems. The future is bright for antioxidant research and since 2012, *Antioxidants* has become a key forum for researchers to bring their findings to the forefront.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [FSTA](#), [PubAg](#), [CAPlus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q1 (*Food Science & Technology*) / CiteScore - Q1 (*Food Science*)
