

## Design and Control of Electrical Machines in Electric Vehicles

Guest Editors:

**Dr. Jinhua Du**

The State Key Laboratory of  
Electrical Insulation and Power  
Equipment, Xi'an Jiaotong  
University, Xi'an 710049, China

**Prof. Dr. Gang Lv**

School of Electrical Engineering,  
Beijing Jiaotong University,  
Beijing 100044, China

**Dr. Xuan Wu**

School of Electrical and  
Electronic Engineering, Hunan  
University, Changsha 410082,  
China

Deadline for manuscript  
submissions:

**closed (30 April 2024)**

### Message from the Guest Editors

This Special Issue aims to present current state-of-the-art research addressing the design and control of electrical machines within the context of electric vehicle applications. We encourage researchers in this field to contribute their original papers and share their technical achievements. The subjects of interest include, but are not limited to, the following:

- New machine topology of electric machines;
- Innovative machine design and analysis methods;
- Multiobjective optimization of electric machines in EVs;
- Vibration and noise suppression technology of electric machines;
- Efficient and reliable control of EV power trains;
- Power electronic devices in EV machine applications;
- New technologies related to EV motor and drive integration;
- Applications of hub motors or multimotor systems in EVs;
- Other advanced technologies related to the modeling, design, and control of electric machines in EVs.

an Open Access Journal by MDPI

## Editor-in-Chief

**Prof. Dr. Giulio Nicola Cerullo**

Dipartimento di Fisica,  
Politecnico di Milano, Piazza L.  
da Vinci 32, 20133 Milano, Italy

## Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Engineering, Multidisciplinary*) / CiteScore - Q1 (*General Engineering*)
