Message from the Guest Editors

The focus of this Special Issue is on the latest advances made in nitride chemistry. These advances cover novel synthetic techniques, structure and property determination, and possible applications in all fields of chemistry, physics and beyond.

Keywords

- Multiparametric biomedical sensors
- Feature extraction
- Neural applications
- Acoustic signal processing
- Decision support system
- Edge computing.

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Multidisciplinary*) / CiteScore - Q1 (*General Engineering*)
