Message from the Guest Editor

Dear Colleagues,

Three-dimensional bioprinting has emerged as one of the leading manufacturing platforms for fabrication of highly complex 3D tissues and/or organs. The field of 3D bioprinting has advanced rapidly over the last few years, notably in the advances of bioprinting technologies and the development of novel printable bio-inks and printing strategies. *Applied Sciences*—in which, the title paper “Advances in Bioprinting for Tissue Engineering and Regenerative Medicine” can be found—publishes research that addresses the needs and goals of 3D bioprinting for tissue engineering and regenerative medicine.

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Multidisciplinary*) / CiteScore - Q1 (*General Engineering*)
