### Message from the Guest Editor

This special issue focuses on the most recent multidisciplinary researches carried out with the aim of understanding environmental processes and ecological aspects fundamental for the conservation of threatened animal and plant species. In particular, results originated from basic science and transferred to applied management programs are presented with special attention to innovative technologies and regulations helpful to better highlight the state of river biodiversity and connected ecosystem services.

## Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Engineering, Multidisciplinary*) / CiteScore - Q1 (*General Engineering*)
