Food Chemistry, National Food
Institute, Technical University of
Denmark, 2800 Kongens Lyngby,
Denmark

Deadline for manuscript
submissions:

closed (15 July 2021)

Message from the Guest Editor

Food analysis is a tremendously large field that is constantly evolving through the introduction of methods allowing increases in productivity, in particular, the current modern miniaturized and robotic analytical techniques. Robotic automated systems guarantee high sample throughput with low labor requirements, while providing reliability. These novel techniques are widely used to yield ready to use extracts, and it is important to prove their applicability in the detection and monitoring of contaminants in food.

For this Special Issue, authors are invited to submit research or review articles on “Novel Analytical Methods Used in the Food Industry”.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo

Dipartimento di Fisica,
Politecnico di Milano, Piazza L.
da Vinci 32, 20133 Milano, Italy

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Multidisciplinary*) / CiteScore - Q1 (*General Engineering*)
