Deadline for manuscript submissions:

31 October 2024

### **Message from the Guest Editors**

Dear Colleagues,

I am delighted to announce the Special Issue entitled "Feature Papers in the Astronomical Sciences" dedicated to provide a distinguished collection of pioneering papers in the whole spectrum of astronomy, astrophysics, and cosmology.

This Theme Issue aims to highlight recent advances and new cutting-edge developments across the field of astronomy, by publishing high-quality reviews and original papers from editorial board members, guest editors, leading researchers, and outstanding scholars invited by the Editorial Board and the Editorial Office of *Astronomy*.

The special issue topics include but are not limited to observational and theoretical astronomy, astrophysics, astroparticle physics, cosmology, as well as on all aspects of gravitational physics.

I hope that this collection will bring new interest in this old field as an attractive node for younger people as well as more experienced researchers who share an interest in this most majestic of all scientific fields.

## **Message from the Editor-in-Chief**

Astronomy (ISSN 2674-0346) is a new international, peerreviewed, open access journal on observational and theoretical astronomy, covering astrophysics, astroparticle physics and cosmology, as well as on all aspects of gravitational physics. Its target is scientific excellence of publications and a transparent and efficient referee procedure, leading to an outstanding reputation within the scientific community of its research field.

#### **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions

**Rapid Publication:** first decisions in 16 days; acceptance to publication in 5.8 days (median values for MDPI journals in the second half of 2023).

**Recognition of Reviewers:** APC discount vouchers, optional signed peer review, and reviewer names published annually in the journal.
