Stomatology, Cheeloo College of  
Medicine, Shandong University,  
Jinan 250012, China

Deadline for manuscript  
submissions:

**31 October 2024**

### Message from the Guest Editor

The treatment of bone defects caused by trauma and disease is a common yet often challenging clinic issue. Biomaterials are an essential scaffolding substance for bone repair that can be engineered to deliver biofactors, stimulate cell functions, and construct a favorable microenvironment in order to support the tissue regeneration process. Numerous metals, ceramics, polymers, as well as their composites, have been processed to provide bone scaffolds, and some of them have already been used for practical applications, yet it is still challenging to design biomaterials that can achieve reliable bone repair and realize biomimetic bone regeneration. Therefore, engineering biomaterials that can actively engage with biological processes during bone repair and regeneration are highly desired. The aim of this Special Issue is to demonstrate the recent development of novel biomaterials with engineered properties for bone repair and regeneration applications. This Special Issue is open to both original papers and reviews.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Bioengineering* (ISSN 2306-5354). *Bioengineering* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. *Bioengineering* provides an advanced forum for the science and technology of bioengineering. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPlus / SciFinder, Inspec, and other databases.

**Journal Rank:** JCR - Q2 (*Engineering, Biomedical*)

**Rapid Publication:** manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 3.6 days (median values for papers published in this journal in the second half of 2023).
