### Message from the Guest Editor

In this Special Issue, the submitted works may include new molecular mechanisms for healthy or cancer cells, the potential use of CAP or PCLs to overcome drug resistance in cancer, or treatments directed against the tumor microenvironment using 2D or 3D models. Interestingly, the impact on tumor subpopulations such as Cancer Stem Cells are not defined yet. Finally, this issue will also cover original works or reviews describing the in vitro and in vivo anti-tumoral effects of plasma-based therapies. We look forward to receiving your contributions.
