Message from the Guest Editors

Wound healing is still an evolving field of research. There are several approaches to achieving healing: multidisciplinary, biotechnology, and strategies to counter biofilms. Infection and biofilm formation is one of the main causes of chronic wounds.

Several advanced dressings, biotechnologies, and biomaterials have been described with the aim of improving the wound healing; among these, hydrogel, platelet-rich plasma (PRP), and dermal substitutes are particularly promising.

In this Special Issue, we would like to highlight the wide variety of hydrogel, PRP, and dermal substitute applications in wound healing and regenerative surgery, analyzing also the biomolecular pathways through which they act. This Special Issue, which will serve as an updated reference for biomaterials and biotechnologies used in wound healing, will collect contributions (original research articles, reviews) dealing with innovative regenerative biomedical applications based on PRP, dermal substitutes, and advanced dressings. Both in vitro and in vivo studies are welcome, with the final goal of shedding light on the new frontiers of advanced dressing, and regenerative strategies in wound healing.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Biomedicines (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within *Scopus*, *SCIE (Web of Science)*, *PubMed*, *PMC*, *CAPLus / SciFinder*, and other databases.

Journal Rank: JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q2 (*Medicine (miscellaneous)*)
