Deadline for manuscript
submissions:

closed (31 October 2021)

Message from the Guest Editors

Dear Colleagues,

To study the complex biological processes holistically, it is imperative to take an integrative approach that combines multi-omics data to highlight the active biomolecules interrelationships and functions. This Special Issue's primary interests are in manuscripts that report original adipose tissue plasticity, mechanistic studies that employ single-cell analyses, spatial transcriptomics, and organoids from adipose tissue. Manuscripts that report other complex co-culture systems or cell-based methods allowing the detection, measurement, and visualization of complex crosstalk mechanisms in adipose tissue plasticity in cellular level, as well as in forms of "deconstructed" organs, will also be very welcome.

Dr. Miguel Luiz Batista Jr.

Message from the Editorial Board

Biomolecules is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Biochemistry)
