University, Halifax, NS, Canada

Message from the Collection Editors

“Emerging Targets and Tissue Engineering Strategies for Repair and Regeneration” is an upcoming Special Issue of Biomolecules. The ultimate goal of the Special Issue is to present the latest discoveries and knowledge in the field of regenerative medicine to an audience comprised of academicians, clinicians, scientists, and researchers in different industry sectors. We are pleased to present this special issue focused on a broad array of therapeutic targets and strategies, from multipotent stem cells, embryonic stem cells, and induced pluripotent stem (iPS) cells to gene therapy and advanced bioengineering technologies for promoting adult tissue regeneration. This Issue considers degenerative diseases affecting all organs and tissues and accepts research findings and reviews on aspects ranging from molecular, cell biology, to clinical sciences. We propose a deadline of 31 December, 2020 for manuscript submission.

an Open Access Journal by MDPI

Message from the Editorial Board

Biomolecules is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Biochemistry*)
