Psychology, Institute of
Psychology, University of São
Paulo, São Paulo 05588-030,
Brazil

Deadline for manuscript
submissions:

31 August 2024

Message from the Guest Editor

Advances in classic areas such as visual acuity, sensitivity to luminance contrast, and Vernier acuity—whether or not applied to developmental diseases such as Amblyopia and Visual Processing Disorders—have been significant for a deeper understanding of the underlying mechanisms of these functions, as well as the functional impacts in these atypical developmental conditions.

The scope of this Special Issue covers original research studies and literature reviews, integrative or systematic, that present the results of new research contributing to knowledge on the mechanisms of spatial vision and spatial and visual perception. Articles that present new diagnostic or intervention methodologies for visual–spatial functions and visual perception are also welcome.

Innovative research in this area includes methodological innovations, with the development of psychophysical, electrophysiological, and imaging measures, which bring innovative contributions and use advanced research and investigation tools. However, there is no thematic or approach restriction if advances in spatial vision and related aspects visual perception are a central part of the work.

an Open Access Journal by MDPI

Pittsburgh, PA 15260, USA

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, CAPlus / SciFinder, and other databases.

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.6 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2023).
