Message from the Guest Editor

Dear Colleagues,

We are pleased to invite you to submit your contribution to the Special Issue “Behavioral and Neural Mechanisms Underlying Sensory–Motor Integration”.

This Special Issue aims to gather basic research and clinical studies highlighting the most recent advances in the field of sensory–motor integration. We invite authors to submit cutting-edge original articles or reviews including behavioral and neurophysiological evidence of intact, excellent or dysfunctional sensory–motor integration. Studies proposing sensory–motor integration training in normal and clinical populations are also welcome. Further, in light of the critical role of visual–motor integration in sport and of auditory–motor integration in music contexts, studies on athletes and musicians will be taken into consideration.

We look forward to receiving your contributions.

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, CAPlus / SciFinder, and other databases.

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.6 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2023).
