

Catalytic Process Intensification for Green Chemistry

Guest Editors:

Dr. Giuseppe Bagnato

School of Chemistry and
Chemical Engineering, Queen's
University Belfast, Belfast BT7, UK

Prof. Dr. Fausto Gallucci

Inorganic Membranes and
Membrane Reactors, Sustainable
Process Engineering, Department
of Chemical Engineering and
Chemistry, Eindhoven University
of Technology, 5612 AZ
Eindhoven, The Netherlands

Deadline for manuscript
submissions:

closed (10 February 2022)

Message from the Guest Editors

It is a pleasure to share with you in order to acknowledge the consistent support from the scholars, we are organizing an “**early bird**” promotion activity in this holiday seasons.

During the first two months of 2021, participating authors can enjoy a special discount if the papers are accepted. The invited papers can enjoy a discount of **400 CHF during 1 January–31 January 2021**, and **300 CHF during 1 February–28 February 2021** respectively.

We aim to highlight novel research on the implementation of a route toward the use of cleaner, safer and more energy-efficient process technology. This Special Issue will include papers focused on a wide range on modern technologies used to produce a multitude of chemicals, fuels, commodity chemicals, fertilisers, pharmaceuticals, materials and mathematical models, involving in the catalytic process intensification for green chemistry.

Do not hesitate to contact us on the matter in case you are interested in contributing.
