Message from the Guest Editor

Dear Colleagues,

This Special Issue is dedicated to organocatalytic processes, which could be realized in ionic liquids medium. This Special Issue will contribute to the field by showing the role of such solvents (or co-solvents) in organocatalysis, especially concerning the selectivity, the enantioselectivity, and the possibility of recycling catalytic species. Special attention will be given to green processes or processes involving bio-sourced ionic liquids and/or substrates.

Prof. Dr. Sandrine Bouquillon
