Osteology, 1st Medical
Department of Hanusch Hospital,
Heinrich Collin Str. 30, A-1140
Vienna, Austria

Deadline for manuscript
submissions:

closed (30 June 2021)

Message from the Guest Editors

Dear Colleagues,

This Special Issue will consist of selected papers from the 9th UK Nuclear Envelope and Chromatin Organization meeting and the 3rd International Meeting on Laminopathies joint conference on 2–5 September 2019 in London, UK. The conference will gather researchers dealing with lamin function and laminopathies and includes a satellite meeting of the European Network for Laminopathies, aimed at cross-fertilization and networking among researchers, clinicians, patients, and their associations and the dissemination of data on therapeutic perspectives.

This Special Issue of *Cells* will be entitled “The New Frontier of Therapies for Nuclear Envelope- and Lamin-Related Diseases”. We will highlight approaches that identify therapeutic targets and strategies in view of developing a cure for laminopathies.

We aim to offer an opportunity for attendees of the meeting to contribute and publish research findings and perspectives in this area. The papers submitted and selected will be subject to a rigorous peer-review process.

Dr. Giovanna Lattanzi

Message from the Editorial Board

Cells has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [CAPus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Cell Biology*) / CiteScore - Q1 (*General Biochemistry, Genetics and Molecular Biology*)
