## Effects of Sex Hormones in the Regulation of Energy Metabolism in Health and Diseases

Guest Editor:

**Prof. Haifei Shi**

Department of Biology, Miami  
University, Oxford, OH, USA

Deadline for manuscript  
submissions:

**closed (14 October 2022)**

### Message from the Guest Editor

Research fields include but are not limited to (1) the impact of sex hormones on structure, molecular and cellular components, physiology, and function of various tissues and organs; (2) novel pathways employed by sex hormones and their receptors in multiple organ systems that regulate physiological functions and behaviors; (3) impact of sex hormonal changes at different life stages on different metabolic systems and behaviors; (4) interaction between sex hormones and central and peripheral nervous system involving their receptors and intracellular signaling pathways in the regulation of various metabolic systems, behaviors, and related disease development and potential treatment strategies; and (5) the latest technologies for evaluating and measuring sex hormone actions in basic and translational preclinical research.

# Special Issue

*cells*

an Open Access Journal by MDPI

## Editors-in-Chief

### **Prof. Dr. Alexander E. Kalyuzhny**

Neuroscience, UMN Twin Cities,  
6-145 Jackson Hall, 321 Church St  
SE, Minneapolis, MN 55455, USA

### **Prof. Dr. Cord Brakebusch**

Biotech Research & Innovation  
Centre, The University of  
Copenhagen, Copenhagen,  
Denmark

## Message from the Editorial Board

*Cells* has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [CAPus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Cell Biology*) / CiteScore - Q1 (*General Biochemistry, Genetics and Molecular Biology*)
