Deadline for manuscript
submissions:

30 April 2022

Message from the Guest Editors

This special issue is an international forum for researchers in the area of analysis, evaluation, and development of solutions using mathematical tools in chemical analysis such as response surface methodology to optimize biological, chemical, cellular, molecular, and immunological responses, among others. We search for studies describing theoretical problems and/or experimental results where molecules with relevant properties for the industrial sector are extracted/identified/quantified/concentrated in food processes systems and employed in the development of novel products in different sectors, such as nutraceutical, cosmeceutical, and pharmaceutical industries. The aim of the special issue is to present recent results, to identify and explore directions for future research of analytical tools to aid and guide the decision-making process, and to foster collaborations.

Keywords:

- Chemosensors in bioactive compounds analysis.
- Mathematical tools
- Response Surface Methodology
- Optimization processes
- Plant food discards
- Industrial applications

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Chemosensors is an international, scientific, open access journal on the science and technology of chemical sensors published by MDPI. All articles are released on the internet immediately following acceptance. The journal publishes reviews, regular research papers, and communications. The scope of Chemosensors includes:

New chemical sensors design

Electrochemical devices, potentiometric sensor, redox electrode

Optical chemical sensors

Analytical methods

Environmental monitoring

Gas detectors

electronic nose, etc.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [CAPlus / SciFinder](#), [Inspec](#), and many [other databases](#).

Journal Rank: [JCR - Q2 \(Instruments & Instrumentation\)](#) / [CiteScore - Q2 \(Physical and Theoretical Chemistry\)](#)
