Application of Response Surface Methodology for Food Optimization Processes

Guest Editors:

Dr. Miguel Ángel Prieto Lage

Prof. Dr. Jesus Simal-Gandara

Dr. Antía González Pereira

Deadline for manuscript submissions:

closed (15 September 2022)

Message from the Guest Editors

This special issue is an international forum for researchers in the area of analysis, evaluation, and development of solutions using mathematical tools in chemical analysis such as response surface methodology to optimize biological, chemical, cellular. molecular. immunological responses, among others. We search for theoretical problems describing experimental results were molecules with relevant properties for the industrial sector are extracted/identified/guantified/concentrated in food processes systems and employed in the development of novel products in different sectors, such as nutraceutical, cosmeceutical, and pharmaceutical industries. The aim of the special issues is to present recent results, to identify and explore directions for future research of analytical tools to aid and guide the decision-making process, and to foster collaborations

Keywords:

- Chemosensors in bioactive compounds analysis.
- Mathematical tools
- Response Surface Methodology
- Optimization processes
- Plant food discards
- Industrial applications

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Nicole Jaffrezic-Renault

Message from the Editor-in-Chief

Chemosensors is an international, scientific, open access journal on the science and technology of chemical sensors published by MDPI. All articles are released on the internet immediately following acceptance. The journal publishes reviews, regular research papers, and communications. The scope of Chemosensors includes:

New chemical sensors design

Electrochemical devices, potentiometric sensor, redox

electrode

Optical chemical sensors

Analytical methods

Environmental monitoring

Gas detectors

electronic nose, etc.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q1 (*Instruments & Instrumentation*) / CiteScore - Q2 (*Analytical Chemistry*)
