

Dear Colleagues,

As Editor-in-Chief of *Children*, I am pleased to announce the winner of the Children Travel Award for 2016:

The **Travel Award** was granted to **Dr. Kezhen Huang**, post-doctoral researcher at the University of Connecticut Health Center, USA. Dr. Huang's research involves exploring the regulation of the toll-like receptor 4 (TLR4) signaling in the intestine by bacterial products, offering potential therapeutic pathways to mitigate the risk of necrotizing enterocolitis in neonates.

The award consists of 800 Swiss Francs to attend the upcoming Pediatric Academic Societies Meeting 2016.

Please join me in congratulating Kezhen on her excellent contribution and notable accomplishment.

Sari Acra, Editor-in-Chief, Children

## 2016 TRAVEL AWARD WINNER

*Children* (ISSN 2227-9067) is an international open access journal of pediatrics published quarterly online by MDPI.

Please find more information on *Children* here: [www.mdpi.com/journal/children](http://www.mdpi.com/journal/children)

The competition for 2017 *Children Travel Award* will be opened in early September. Please check [www.mdpi.com/journal/children](http://www.mdpi.com/journal/children) for more information closer to this date.
