### Message from the Guest Editors

I'm serving as Guest Editor for a new article collection for *Children* (ISSN 2227-9067, IF 2,863), entitled "Pediatric Rheumatology Diseases: New Advances in Therapeutic Approaches".

The incidence of rheumatological diseases in children has increased significantly. Very often, unfortunately, the therapies available are not effective, with serious consequences in terms of mortality and morbidity. Clinicians often treat these patients with off-label drugs. For this reason, it would be very useful to highlight the effectiveness of new therapeutic strategies in order to help clinicians in the treatment of rheumatological pathologies refractory to standard therapies.

We are interested in original articles, reviews, case reports/case series that describe an original aspect or evident therapeutic advances in these diseases.

The submission deadline is 20 March 2023. We look forward to your contributions.
