Message from the Guest Editor

Dear Colleagues,

Aeroacoustics and hydroacoustics are increasingly gaining importance in a wide spectrum of engineering applications such as ground and space transportation, ventilation systems, wind turbines, etc.

Computational modeling of aeroacoustics and hydroacoustics represents one of the today's most challenging areas in fluid mechanics.

The issue is devoted to recent research in the development and innovative application of computational methods in aeroacoustics and hydroacoustics, and welcomes such contributions in all relevant engineering applications.

Prof. Dr. -Ing. habil. Ali Cemal Benim

Message from the Editor-in-Chief

You are invited to submit the results of your research for consideration and publication in *Computation*, an international open access journal, which is published quarterly online by MDPI.

The editorial board and staff of *Computation* are dedicated to establishing a benchmark journal for the world scientific and engineering communities for original research articles, reviews, conference proceedings (i.e., peer reviewed full articles), and communications, in the cutting-edge areas of computational biology, computational chemistry, and computation in engineering.

Author Benefits

Open Access:— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, ESCI (Web of Science), CAPlus / SciFinder, Inspec, dblp, and many other databases.

Journal Rank: CiteScore - Q2 (*Applied Mathematics*)
