### Message from the Guest Editors

The main goal of this Special Issue on “Macromolecular Serial Crystallography” will be to gather research manuscripts from experts in the field (chemists, biologists, physicists, and structural biologists) to create an international platform to provide rich reference information on the latest advances and exciting discoveries in the still emerging technology of serial crystallography in XFELs and synchrotron radiation sources.

The potential topics include, but are not limited to:

- Serial femtosecond crystallography
- X-ray free-electron lasers
- Synchrotron radiation sources
- Pink-beam serial crystallography
- Sample delivery techniques
- Data processing and analysis for serial crystallography
- Submicron-crystals
