Deadline for manuscript submissions:
closed (25 December 2022)

Message from the Guest Editor

Dear Colleagues,

Dairy production will need to increase to meet demand from an increased global population and economic growth. Simultaneously, livestock practices are under increased pressure to decrease their negative social and environmental impacts. Technologies and digital innovations can assist dairy stakeholders with this by improving efficiency, enabling better decisions, and establishing trust.

This Special Issue aims to publish research articles dedicated to current (and future) technologies and digital innovations in dairy production and processing.

Dr. Andrea Pezzuolo

Message from the Editor-in-Chief

Dairy (ISSN 2624-862X) is an international, peer-reviewed open access advanced forum for studies related to the advances in dairy science. It publishes reviews, regular research papers and short communications. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the maximum length of the papers. The full experimental details must be provided so that the results can be reproduced.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within ESCI (Web of Science), Scopus, FSTA, and other databases.
Journal Rank: CiteScore - Q1 (Agricultural and Biological Sciences (miscellaneous))
