### **Message from the Guest Editors**

Dear Colleagues,

Recently, erosive tooth wear has become a great concern for clinicians and dental researchers because of its multi-factorial nature involving biological, chemical and behaviour factors, and can affect all age groups, with a high prevalence and of various severities. To combat this, different approaches are available based on extensive clinical and research experiences, which have cumulated a viable amount of knowledge. In this Special Issue, all review or research articles on erosive tooth wear are welcomed with the emphasis on, but not limited to, basic science, aetiology, diagnosis, clinical treatment, theory, mechanism, and multi-disciplinary approaches. The Special Issue is keen on providing a platform to record, exchange and share the scientific knowledge and evidence via the *Dentistry*, which is an open access journal, and aims at maintaining the most updated current concepts in erosive tooth wear.

Dr. James Kit Hon Tsoi

## Message from the Editor-in-Chief

The *Dentistry Journal* (ISSN 2304-6767) is an official, peer-reviewed publication of MDPI, which transmits original papers as well as review articles from the entire field of dentistry to the scientific community. The *Dentistry Journal* supports scientific innovations, and clinical and experimental research within the whole field of dentistry and its related areas. The *Dentistry Journal* in particular supports interdisciplinary and translational studies. The *Dentistry Journal* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

## Author Benefits

**Open Access:** free for readers, with **article processing charges (APC)** paid by authors or their institutions.

**High Visibility:** indexed within **Scopus**, **ESCI (Web of Science)**, **PubMed**, **PMC**, and **other databases**.

**Journal Rank:** CiteScore - Q2 (*General Dentistry*)
