Message from the Guest Editors

The design of an air vehicle is a multidisciplinary design process, where different specializations fuse to create tangible solutions. The current Special Issue will focus on air vehicle innovation with regard to the mitigation of aviation's environmental impact. Disruptive technologies that may contribute to the aim of improving aviation are also of key interest. More specifically, manuscript submissions in the areas mentioned below are highly encouraged.

Deadline for manuscript submissions:

closed (31 December 2020)
