submissions:

closed (31 October 2022)

Message from the Guest Editor

A variety of psychiatric and sleep disorders including, but not limited to, depression and insomnia are quite common and greatly impair the quality of life. The current diagnosis and the prediction of prognosis in psychiatric and sleep disorders largely depend on the clinician's judgment, which is made based on the clinical characteristics, DSM system, and polysomnography, among other factors. Since the underlying neurobiology and etiology is diverse, however, the current diagnostic and prognostic schemes in psychiatry are in need of improvement.

The algorithms developed from machine learning and big data provide new hope to address these issues. Machine learning is based on individual-level analysis, which enables us to predict the development and prognosis of a disease, attracting substantial attention in the field of psychiatry and sleep medicine. Big data has also been providing opportunities for new insights that have not previously been achieved through research on individual datasets.

The forthcoming Special Issue focuses on machine learning and big data in psychiatric and sleep disorders.

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*)
