## Genetic Diversity and Phylogeography of Plants under Climate Change

Guest Editors:

**Dr. Denis Sandanov**

Institute of General and  
Experimental Biology, Siberian  
Branch, Russian Academy of  
Sciences, 670047 Ulan-Ude,  
Russia

**Dr. Zhiheng Wang**

College of Urban and  
Environmental Sciences, Peking  
University, Beijing 100871, China

Deadline for manuscript  
submissions:

**closed (15 August 2022)**

### Message from the Guest Editors

Evolutionary adaption can increase the possibility of the adjustment of a plant's genetic structure, and thus allow species to reduce the climate change adaptation lag. Past distribution patterns are often reflected in current species phylogenies and can be associated with divergent environmental conditions. Previous studies have indicated that severe climate fluctuations since the Quaternary have influenced patterns of genetic diversity. A crucial question is how genetic diversity can be integrated into studies that aim to predict plant species' responses to future climate scenarios. In this direction, it is important to consider the phylogeography of species. Studies on the phylogeny and geographic patterns of genetic diversity can reveal insights into the formation and evolution of plant species in different regions and their relationships with environmental conditions. This Special Issue aims to combine a wide spectrum of studies related to the diversity of plants within a changing climate on a genetic level, combined with their phylogeographic structure.

## Editor-in-Chief

### **Prof. Dr. Michael Wink**

Institute of Pharmacy and  
Molecular Biotechnology,  
Heidelberg University, Im  
Neuenheimer Feld 329, D-69120  
Heidelberg, Germany

## Message from the Editor-in-Chief

*Diversity* (ISSN 1424-2818) is a scholarly journal that covers all areas of diversity research. Our distinguished editorial board and refereeing process ensures the highest degree of scientific rigor for publishing. Original research articles and timely reviews are released online, with unlimited free access.

We invite papers and reviews on multidisciplinary topics of diversity that bridge organismic diversity (systematics, biodiversity, phylogeny, population genetics, and evolution) and molecular diversity (phytochemistry and biophysics).

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubAg, GEOBASE, CAPus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Biodiversity Conservation*) / CiteScore - Q2 (*Agricultural and Biological Sciences (miscellaneous)*)
