This Special Issue aims to explore the current social political environment in which we find ourselves operating. Legislative policies vary per state; however, most can agree that the current political environment, as experienced by university professors and administration, is unstable and uncertain. This uncertainty forces professors and university administration professionals to grapple with and attempt to make sense of continuing their missions of teaching relevant subject matters amid the chaos. This environment is chaotic as students consider how to continue their fields of study when they include issues of race, equity, and sometimes even history. Students are renegotiating their dissertation topics and questioning the choice they made years ago to study areas that are now restricted.
