Analog Integrated Circuits in Edge Computing

Guest Editors:

Dr. Szymon Szczęsny
Faculty of Computing and Telecommunications, Poznań University of Technology, 60-965 Poznań, Poland

Dr. Marek Kropidłowski
Faculty of Computing and Telecommunications, Poznań University of Technology, 60-965 Poznań, Poland

Dr. Michał Melosik
Department of Computer Science,Poznan University of Technology, 60-965 Poznań, Poland

Deadline for manuscript submissions:
closed (31 March 2023)

Message from the Guest Editors

The main goal of this Special Issue is to present effective implementations of analog integrated circuits, hardware-oriented algorithms, design methods, and optimizations of CMOS circuits aimed at processing analog data close to the source. Today, such solutions are particularly desirable in medical applications, implantable chips, low-power electronics, human energy harvesting, autonomous distributed systems, wearable devices, etc. The topics of interest include, but are not limited to:

- Mixed-signal integrated circuits;
- Analog CMOS preprocessors and accelerators;
- Field-programmable analog array (FPAAs), analog IPcores;
- Edge AI, CMOS implementation of neural networks;
- Sensor data analysis, sensor techniques;
- Hardware-oriented algorithms for analog signal processing;
- Low-power IC, weak-inversion mode, moderate-inversion mode;
- Optimization and design automation of analog CMOS circuits;
- Analog-to-digital Converters, $\Sigma\Delta$ modulators.

Special Issue

Editor-in-Chief

Department of Electronics and
Telecommunications,
Politecnico di Torino, 10129
Torino, Italy

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, and other databases.
Journal Rank: JCR - Q2(*Electrical and Electronic Engineering*) CiteScore - Q2 (*Electrical and Electronic Engineering*)
