## Biodiesel Production

Guest Editor:

**Prof. Dr. Juan A. Reyes-Labarta**

Department of Chemical  
Engineering, Spain Science  
Faculty, University of Alicante,  
Section 99, 03080 Alicante, Spain

Deadline for manuscript  
submissions:

**closed (20 June 2019)**

### Message from the Guest Editor

The Special Issue on “Biodiesel Production” should contemplate three different perspectives:

- Experimental research at different levels: Laboratory and pilot plants
- Modelling approaches (kinetics, phase equilibria, etc.) in order to be able to simulate, study and optimize production processes
- Environmental analysis through the corresponding life cycle assessment, in order to correctly characterize all the different alternatives

Thus, this Special Issue should include the followings items:

- Review or state-of-the-art of new realistic alternatives to raw materials, including, e.g., used frying oils, lignocellulosic materials, or the possible use of microalgae, which could work also as CCU (CO<sub>2</sub> capture and utilization technology), etc.
- Review or state-of-the-art of alternative and new chemical processes for biodiesel production, including different kinds of homogeneous and heterogeneous catalysts.
- Review or state-of-the-art of alternative and new separation processes to increase yields in biodiesel production, or reduce the corresponding economical costs.

## Editor-in-Chief

### **Prof. Dr. Enrico Sciubba**

Department of Mechanical and  
Aerospace Engineering,  
University of Roma Sapienza, Via  
Eudossiana 18, 00184 Roma, Italy

## Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (*Engineering (miscellaneous)*)
