Circular Economy in Low-Carbon Transition

Guest Editors:

Prof. Dr. Anna Mazzi

Department of Industrial
Engineering, University of
Padova, Padova, Italy

Dr. Jingzheng Ren

1. Department of Technology and
Innovation, University of
Southern Denmark, Campusvej
55, 5230 Odense, Denmark
2. Department of Industrial and
Systems Engineering, The Hong
Kong Polytechnic University,
Hong Kong, China

Deadline for manuscript
submissions:

closed (25 October 2021)

Message from the Guest Editors

Dear Colleagues,

It is my great pleasure to invite you to submit your most recent research to this Special Issue. This Special Issue will outline a roadmap of circular economy in the low-carbon transition, through the exchange of experiences in different contexts with both environmental and socio-economic points of view. Qualitative and quantitative measurements in resources/energy utilization, multi-criteria impact assessment in energy systems, and closing the loop strategies and initiatives represent valuable contributions for this Special Issue.

In particular, we encourage submissions of research articles, case studies, and review articles related but not limited to the following:

- Policies and metrics to support a circular economy and low-carbon transition
- Behavior and market analysis in a circular economy and low-carbon transition
- Multi-criteria analysis of energy systems
- Multi-criteria analysis of reuse/recycle processes
- Strategies and experiences for energy efficiency
- Risks/benefits analysis of second/third raw materials
- Opportunities and obstacles in a circular economy and low-carbon transition

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Engineering (miscellaneous)*)
