Energy Economics and Innovation of Smart Cities

Guest Editor:

**Prof. Dr. Daniel Pérez
González**

Chair of R & D Group: Application
of Information Technology for
Competitiveness and Innovation,
Department of Business
Administration, Faculty of
Economics and Business
University of Cantabria, 39005
Santander, Spain

Deadline for manuscript
submissions:

closed (4 December 2020)

Message from the Guest Editor

The Guest Editor is inviting submissions to a Special Issue of *Energies* on the subject area of “Energy Economics of Smart Cities”.

There are multiple definitions of a smart city. We can say that all of them co-exist so that a smart city is a city that uses technological advances (such as IoT, big data, cloud computing, AI etc.) to transform itself into an innovative ecosystem, concerned with achieving the well being of its citizens, with special attention to sustainable development (Díaz-Díaz, Muñoz, & Pérez-González, 2017a). The above is a pending challenge and to achieve that it requires four fundamental and synergistic elements in a smart city: the technological, the economic, the management of energy resources, that allow sustainable development, and the perception and social concern about these issues (Pérez-González, & Díaz Díaz, 2015; Díaz-Díaz, Muñoz, & Pérez-González, 2017b)...

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and
Aerospace Engineering,
University of Roma Sapienza, Via
Eudossiana 18, 00184 Roma, Italy

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Engineering (miscellaneous)*)
