## Load Modelling of Power Systems

Guest Editors:

**Prof. Dr. Sasa Djokic**

**Prof. Dr. Jan Desmet**

**Prof. Dr. Lidija M. Korunović**

**Prof. Dr. Matti Lehtonen**

Deadline for manuscript  
submissions:  
**closed (31 March 2022)**

### Message from the Guest Editors

Dear Colleagues,

The general theme of this Special Issue is modelling of loads in the context of analysis, control and operation of existing electricity supply networks and future “smart grids”, at all voltage levels and in a variety of applications, including:

- Modelling of recently introduced, new and emerging types of loads;
- Load models of different classes of customers in modern power supply systems;
- Measurement-based and component-based load modelling approaches;
- Time-domain, frequency-domain and other load models and modelling techniques;
- Static and dynamic load models and modelling methodologies;
- Data analytics and data mining for load modelling purposes;
- Load profiling, load decomposition and load disaggregation;
- Modelling and representation of aggregate loads and evaluation of their impact;
- Combined load-generation-storage-network models, e.g., models of “active distribution network cells”, microgrids and virtual power plants;
- Load modelling in related “smart grid” applications, e.g., demand-side management and demand-response schemes, functionalities and services.

Eudossiana 18, 00184 Roma, Italy

## Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (*Engineering (miscellaneous)*)
