Frontier 2022: Sustainable Management of Water and Wastewater Treatment Systems

Guest Editor:

Dr. Kazi Parvez Fattah

Department of Civil Engineering,
American University of Sharjah,
Sharjah, United Arab Emirates

Deadline for manuscript
submissions:

closed (20 June 2022)

Message from the Guest Editor

The importance of water and wastewater systems globally has increased substantially in recent decades as water scarcity and pollution from improper wastewater treatment discharges play havoc to our fragile natural environment. While important breakthroughs in the treatment of water and wastewater have occurred, it is equally important to determine the environmental impacts of these processes and related activities.

This Special Issue will focus on emerging technologies that focus on the environmental management of water and wastewater treatment systems. Topics of interest for publication include, but are not limited to:

- Innovative water production processes;
- Sustainable wastewater treatment processes;
- Life cycle analysis of water and wastewater treatment systems;
- Environmental impact and remediation of treatment processes;
- Management of contaminants of emerging concern;
- Treatment and reuse of waste from treatment plants;
- Risk assessment of treatment processes and collection networks;
- Resource recovery from treatment plants;
- Waste management at treatment plants.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and
Aerospace Engineering,
University of Roma Sapienza, Via
Eudossiana 18, 00184 Roma, Italy

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Engineering (miscellaneous)*)
