Advances in Design, Modeling and Analysis of Electrified and Sustainable Transport Systems

Guest Editors:

Dr. Piotr Gołębiowski

Division of Transportation
Systems Engineering and
Logistics, Faculty of Transport,
Warsaw University of Technology,
Warsaw, Poland

Dr. Jolanta Żak

Division of Transportation
Systems Engineering and
Logistics, Faculty of Transport,
Warsaw University of Technology,
Warsaw, Poland

Dr. Jacek Kukulski

Division of Traffic Control and
Transport Infrastructure, Faculty
of Transport, Warsaw University
of Technology, Warsaw, Poland

Deadline for manuscript
submissions:

closed (30 November 2021)

Message from the Guest Editors

We would like to invite you to prepare an article for this Special Issue of *Energies*, of which we are honored to be Guest Editors. This Special Issue is devoted entirely to the sphere of transport. It aims to present the latest achievements—scientific research, developed technologies, and organizational and legal solutions—relating to the design, modeling, and analysis of "electrified" and sustainable transport systems.

The first area of scientific interest in this Special Issue concerns the electrification of transport systems. This area is in line with the current trends in the development of electromobility in individual countries. Accordingly, this Special Issue is dedicated to considering the topics of design, modeling, and analysis relating to vehicles, infrastructure, IT tools, telematics, and logistics.

The second area of scientific interest in this Special Issue concerns sustainable transport systems. We should strive to ensure that the conducted research, developed technologies, and prepared organizational and legal solutions take into account the principle of sustainable transport development.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and
Aerospace Engineering,
University of Roma Sapienza, Via
Eudossiana 18, 00184 Roma, Italy

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Engineering (miscellaneous)*)
