### Message from the Guest Editor

This Special Issue is to publish a set of research articles that demonstrate the effectiveness of innovative concepts that combine the above aspects, to fulfil the maximum building energy demands meeting long-term and changing needs and requirements of building users.

We are inviting original works for peer-review and possible publication, presenting combinations of materials and systems capable of fulfilling the electrical, thermal, and cooling demands of low-energy consumption buildings. Manuscripts combining experimental implementation with theoretical calculations and techno-economic assessment are encouraged.
