## Transition to Sustainable and Integrated Energy Systems for Smart Cities and Industries

Guest Editors:

**Prof. Dr. Oana Luca**

Faculty of Civil, Industrial and  
Agricultural Engineering,  
Technical University of Civil  
Engineering, Bucharest, Romania

**Prof. Dr. Ilinca Nastase**

Building Services Engineering  
Faculty, Technical University of  
Civil Engineering of Bucharest,  
Bd. Pache Protopopescu no.66,  
021412 Bucharest, Romania

Deadline for manuscript  
submissions:  
**closed (20 January 2023)**

### Message from the Guest Editors

The global energy sector is in the midst of a transition, due to economic, health, social, and environmental concerns driven by climate change. Achieving a zero-emission economy by the middle of the century requires a profound reshaping of the energy system, with a major shift from carbon-intensive fossil fuels to clean energy sources. In addition to the smart approach, research is necessary for the design of pathways to zero net emissions in cities around the world, with ambitious and targeted actions; in buildings and neighborhoods, in public and private transport, and in industry and services. The participation and cooperation of all stakeholders is necessary to shape the new system.

Submissions for this **Special Issue** are expected to include papers on the following topics:

- Policies and strategies towards energy transition.
- Energy efficient and healthy buildings.
- Net zero solutions for sustainable and smart neighbourhoods.
- Sustainable transport including electrification, sustainable bioenergy or green hydrogen, enhanced public transport, and shared mobility.
- Energy and waste management.
- Energy communities.

Department of Mechanical and  
Aerospace Engineering,  
University of Roma Sapienza, Via  
Eudossiana 18, 00184 Roma, Italy

## Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (*Engineering (miscellaneous)*)
