## **Bayesian Statistics and Applied Probability for Games and Decisions**

Guest Editor:

#### Dr. Tevfik Aktekin

Department of Decision Sciences, Paul College of Business and Economics, University of New Hampshire, Durham, NH 03824, USA

Deadline for manuscript submissions:

closed (20 August 2022)

# Message from the Guest Editor

Dear Colleagues,

The quantification of uncertainty as an aid in decision making has been an essential part of various fields and respective modern applications. The objective of this Special Issue is to highlight recent advances in the analysis of games and decisions using Bayesian methods of inference or applied probability, more broadly defined. We anticipate these advances to stem mostly from modern computational aspects of decision making under uncertainty spanning across fields such as engineering, sciences, business, economics, and reliability/risk, among others. The Special Issue is designed to be interdisciplinary in nature and welcomes both novel methodological and application-focused research contributions across a myriad of fields. Some examples of areas of interest include (but are not limited to) sequential decision analysis, Bayesian information theory, state space time series analysis, stochastic volatility, Markov chain Monte Carlo methods, particle-based estimation, reliability and risk, multicriteria decision making, Bayesian networks, optimization, simulation-based decision theory, and multistage decision analysis.

## **Message from the Editor-in-Chief**

The concept of entropy is traditionally a quantity in physics that has to do with temperature. However, it is now clear that entropy is deeply related to information theory and the process of inference. As such, entropic techniques have found broad application in the sciences.

Entropy is an online open access journal providing an advanced forum for the development and/or application of entropic and information-theoretic studies in a wide variety of applications. Entropy is inviting innovative and insightful contributions. Please consider Entropy as an exceptional home for your manuscript.

#### **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), MathSciNet, Inspec, PubMed, PMC, Astrophysics Data System, and other databases.

**Journal Rank:** JCR - Q2 (*Physics, Multidisciplinary*) / CiteScore - Q1 (*Mathematical Physics*)
