Deadline for manuscript  
submissions:

**closed (15 October 2020)**

### Message from the Guest Editors

Urban air pollution is a complex mixture of gases and particulate matter originating from a variety of sources, which then concentrates, disperses, or deposits from the atmosphere, according to the local climate, topography, urban structures, and vegetation.

This Special Issue is seeking original, unpublished papers that advance our understanding towards the effective use of plants in reducing the concentration of pollution in urban atmospheres. We particularly welcome papers from empirical research, modelling, remote-sensing, urban planning, design and decision support tools, citizen science approaches, fundamental plant science, social sciences, and specific case-studies, which span a range of spatial scales. The aims of these collected works are to offer new insights towards the optimisation of species, planting designs, and effective spatial planning techniques for the effective deployment of vegetation to reduce air pollution in the urban environment.

## Editor-in-Chief

### **Prof. Dr. Sergio Ulgiati**

1. Department of Science and  
Technology, Parthenope  
University of Naples, Centro  
Direzionale, Isola C4, 80143  
Napoli, Italy  
2. State Key Joint Laboratory of  
Environment Simulation and  
Pollution Control, School of  
Environment, Beijing Normal  
University, No. 19 Xijiekouwai  
Street, Beijing 100875, China

## Message from the Editor-in-Chief

Environmental issues are quickly becoming central political, economic and academic topics of the twenty-first century. A large number of modern challenges are directly or indirectly caused by complex interactions between environmental issues. Such issues require interdisciplinary research, knowledge and insights to understand and, ultimately, for solutions to be found. Through the journal *Environments*, we strive to create a platform for meaningful discourse by accepting contributions from a wide range of fields. We sincerely hope you will consider publishing your distinguished work in this highly-accessible, peer-reviewed journal.

## Author Benefits

**Open Access:** free for readers, with **article processing charges (APC)** paid by authors or their institutions.

**High Visibility:** indexed within **Scopus**, **ESCI (Web of Science)**, **PubAg**, **AGRIS**, **GeoRef**, and **other databases**.

**Journal Rank:** CiteScore - Q1 (*Ecology, Evolution, Behavior and Systematics*)
